## **KS3 Curriculum Overview**

### **Curriculum Rationale**

In History we recognise the importance of developing a challenging curriculum that helps our pupils understand that they are global citizens with global responsibilities. To study history is to understand how our world and society has developed and how it shapes the world that we live in today. Linking the past to the present reminds us of the importance of morality, equality, tolerance and self-reflection. We aim to develop inquisitive, curious and passionate historians who care for and respect the world around them, at a local, national and global level. Our role is to open eyes, to inspire awe and wonder, to challenge misconceptions, conspiracies, stereotypes, populism and apathy.

We have developed a knowledge rich curriculum that tracks the key moments in British and global history and provides pupils with the opportunity to explore key concepts within the context of their time period. Our curriculum provides the opportunity for pupils to know more but also develops their disciplinary knowledge so that they can do more by developing and revisiting key mastery concepts of throughout the key stage. We recognise the importance of learning across the curriculum and seek to build links across the school with other departments, with opportunities for joint planning that can enrich, deepen and broaden our students' learning experience.
