

Our Lady's Catholic College

Departmental Vision: Geography

Our Lady's Catholic College, Morecambe road, Lancaster, La12rx

Our Geography Department inspires students to develop a deep and enduring curiosity about the world around them. We are committed to fostering a lifelong love for Geography by delivering a rich, sequenced curriculum that challenges students to think critically, explore global issues, and understand the complex interactions between people and the environment.

Through high-quality teaching and learning, we empower students to make sense of their world, both locally and globally. We promote sustainability at the heart of our curriculum, encouraging students to consider the impact of human activity and to become responsible global citizens of our common home.

Our curriculum is designed to challenge learners intellectually, enabling them to ask powerful questions, analyse data, and draw evidence-based conclusions. Fieldwork is an essential element of our curriculum, giving students the opportunity to apply the fieldwork cycle and work collaboratively with others.

In every lesson, we strive to cultivate curiosity, build resilience, and encourage independent thinking. Our ambition is to develop geographers who are not only knowledgeable but also thoughtful, ethical, and ready to engage with the challenges of an interconnected world.
